Lot number: M0103

Dietary supplement on the basis of iodine enriched with biosignals of selected substances.

Atyrosin$^+$
Contents: 30 ml
Dietary supplement on the basis of iodine enriched with tyr* biosignals of selected substances.
Iodine contributes to the normal production of thyroid hormones and normal thyroid function, as well as to the maintenance of normal skin. It also has a role in the cognitive function and the functioning of the nervous system.
Biosignals are imprinted with the electromagnetic method MOLIT.

* Mark for the biosignals related to enhanced thyroid function.

Directions: recommended daily intake is 24 drops (1.32 ml). 12 drops in the morning on an empty stomach and 12 drops in the late afternoon, before dinner. Maximum daily allowance is 50 drops (2.75 ml).

Shake before use. 5 minutes before taking the drops, and right after that do not brush your teeth with a toothpaste, and do not consume any food or liquid except water. When you take the drops, swill them around in your mouth for 1 to 2 minutes before swallowing.

The dietary supplement is not a substitute for varied and balanced diet.
Do not exceed the stated maximum daily allowance.
Keep out of reach of children.
Store in a dark place away from sources of electromagnetic radiation (TV, computer, mobile phone, etc.), and between 1 ^{o}C and 25 ^{o}C.
